

THE GLEICHEN CALL

VOLUME XXXIII NO. 11 GLEICHEN, ALBERTA, WEDNESDAY MAY 30 1940 SUBSCRIPTION \$2.00 PER YEAR

TOWN COUNCIL CONSIDER REPAIRS TO WATER SYSTEM

An offer to purchase the former Oddfellows Hall had been received by the council from the Western Canada Refrigeration Ltd. The price offered was \$800; terms 25 per cent cash, 25 per cent on December 31, 1940 and the balance December 31, 1941, with interest at 6 per cent on unpaid balance. This offer was not accepted. A resolution was then passed offering the property to the Western Canada Refrigeration Ltd. for \$500 cash and current taxes. Councillor Wright voted against the resolution.

Estimates for the repairing of the water mains were submitted by Councillor Michael. Three plans had been prepared; one costing \$18,000 one \$14,000 and \$8,000. It was decided that the \$14,000 plan would put the water system in satisfactory shape. In order to carry out the project without increasing the taxes it was suggested that application be made to the government for a loan under the municipal improvement assistance act 1938, if this was still in force. This would make it possible to carry out the work without loss of the revenue from the water.

A resolution was passed that application be made for a loan of \$14,000 from the government.

The Community Hall committee was requested to look into the matter of widening the exit doors of the hall to conform with the regulations made by the chief inspector of theatres.

The sitting of the court of revision to hear appeals against the assessment was set by resolution for Monday June 3rd.

A petition was set as the date to pay the tax sale of the following properties: lots 8 and 9 part in block 9 lots 20 and 22 in block 9 lots 9 and 10 in block 9; lots 1 and 2 in block 10; lots 19 and 20 in block 11 all in plan 758-N.

It was proposed to gravel the portion of Crowfoot Street from the highway west to the Memorial Corner, and it was suggested that truckers be given an opportunity to tender for approximately 100 yards of gravel for this portion of the street.

A petition was presented to the council requesting that steps be taken to construct a dam in the west end of the town to hold the water back during the time of floods, but after inspecting the grounds it was felt that this would be impracticable.

PRINC. J. F. GORRILL LOCAL SCHOOLS DIED THURSDAY

James Fletcher Gorrell, principal of the Gleichen schools, died at his residence, Thursday morning, after an illness of two weeks. About a year ago he suffered a severe attack of flu from which he was a long time recovering. This sickness no doubt had much to do in weakening his system and apparently was the cause of his death. He was in good condition when he was attacked on April 26.

Mr. Gorrell had been principal of the schools here for almost 11 years, coming to Gleichen from Stirling where he taught for several terms. He was a Mason of many years standing and for the past couple of years was secretary of the local lodge. He was one of the organizers of the local library and took great pride in the work after it, making it his favorite hobby.

Mr. Gorrell was born in England 77 years ago and had been in the teaching profession for the past 19 years.

He is survived by his wife, Edna; three daughters, Winnie, Margory and Ellen; one son, James; his mother of Calgary; sister, Mrs. O. P. Preshe of Athabasca; brother, George, a member of the Canadian Air Force at Trenton, Ont., who was present at the funeral.

The funeral took place Sunday afternoon when private services were conducted at his late residence at 2 p. m. by Rev. J. W. Hume, George H. Pearson, of the Anglican church, after which the remains, followed by members of the local Masonic Lodge

and a large number of friends, were taken to Standard for burial in the family plot. Arriving at cemetery the Standard Masons were on hand and R. W. Bro. A. R. Yates led the Masonic services.

The pall-bearers were brother Mison, namely Messrs. Busch, Scott, Umbrite, Thompson, Somerville and Park.

WAR SAVINGS CERTIFICATES ON MARKET SOON

Plans for the sale of War Savings Certificates and the widespread acceptance of individual thrift programs as a war effort are now being organized. Hon. J. L. Baldwin, Minister of Finance, has announced the appointment of W. H. Somerville, of Waterloo, Ont., and de Gaspé-Brown, of Montreal, as national chairman of the National War Savings Bureau.

Mr. Burns, chairman of the Alberta committee, has been appointed Alberta chairman of the War Savings Committee. Provincial committees, to be announced in the near future will be representative of agriculture, labor, industry, finance education and the professions.

War Savings Certificates, to be sold in multiples of \$5, are designed to give everyone, including school children, an opportunity to share in the war effort in Canada's fight for freedom. In addition to making a very effective contribution to the mobilization of Canadian resources, War Savings Certificates provide an opportunity by which every Canadian old and young, may build up a record of purchasing power.

IMPERIAL OIL ENTERTAINERS HERE NEXT WEEK

The Imperial Oil 5 Star agents and dealers of Gleichen and Cluny have arranged for the Imperial 5 Star Entertainers to stage a two hour vaudeville review in the Community Hall on Thursday evening May 31st commencing at 8:30 sharp. This is a high class vaudeville show and is free to all. Those who wish to attend must secure tickets of admission from either W. Somerville of Cluny or R. S. McQueen of Gleichen, Imperial Oil agents and dealers. During the past winter this show has played in a large number of eastern centres and is now touring the west. Those who have seen it cannot speak too highly of the performance and state it is well worth attending. Remember there is no charge and be sure to get tickets of admission.

THE WEEK IN EDMONTON

(By Dan E. Campbell)

Leaders of Western Canada and United States governments, including premiers, lieutenant-governors and governors will join with the two major railroad presidents and others in the opening ceremonies in connection with the Jasper-Banff mountain skyway. Announcement was made by J. A. McNeil, secretary of the Alberta Motor Association last week.

Officials of the federal travel bureau will play important parts in the ceremonies, which will attract visitors from all over North America. Governors of Washington, Idaho, California, Nevada, Montana, Wyoming, New Mexico, Utah, Colorado, Texas, Oklahoma, Kansas, Nebraska, South and North Dakota have been invited. A special invitation has been extended to R. H. H. B. Bennett, now resident in Surrey, England. It was during Mr. Bennett's administration that the legislation resulting in the start of operations was passed.

Covering 140 miles of mountain

LOCAL NEWS ITEMS OF THE TOWN AND DISTRICT

Who said this was a phony war? The rain Sunday seriously interferred with highway traffic between here and Medicine Hat.

Late Sunday afternoon severe heavy showers fell over the district where it was heavy it effectively put a stop to farmers busy seedling.

General Yates received word he has passed his examinations at the university. It will be another year before he has his final examination.

The Girl Guides of Gleichen wish to express their thanks for the kind co-operation of all, who made possible the large sale of Guide cookies, which has helped the financial condition of the company.

Preparations are going ahead for May 24th celebration. Owing to the season of the season it is hoped that many farmers can arrange their work so that they can take a half off and come to town and attend the afternoon sports and enjoy the big dance at night.

The new park is beginning to take shape with the recent planting of several hundred more trees and many of them are now budding out. Given time and proper attention, which has been promised by members of the Board of Trade, it should be a real beauty spot.

Alfred Smith, a resident of Edmonton, who for the past five years and fairly well known about town, died very suddenly last week at the age of 41 years. Mr. Smith had never complained of being unwell recently his sudden death by heart failure was a complete surprise. He was born in England and came to the province 34 years ago and followed his occupation as a painter. He came to live in Calgary. Funeral services were held Thursday afternoon at 2 p. m. at St. Saviour's church. Major J. J. Sutherland assisted at other Salvation Army officers for which interment was made in the cemetery.

There will be an increase of six per cent of the area of spring wheat in Canada if farmers intentions are carried out, it was reported recently by the Dominion bureau of statistics. Total wheat area in Canada is given as 28,245,500 acres for 1940. This is approximately one and half million acres more than last year. The spring wheat only 16 per cent of the spring wheat area in the prairie provinces had been planted up to April 30. At that date less than 10 per cent of the seeding was completed.

territory, the new highway will be without equal anywhere in the world. It is anticipated that this attraction alone will create a new and growing branch of the tourist business which Canada needs so vitally at the present time. Entertaining centres are already establishing bungalow camps along the route, and from many villages, towns and cities comes word of special courtesy measures to be practiced by all who come in contact with tourists. "Cash in on tourism" is the keynote of the campaign.

Mailed improvement in Alberta's oil industry and prospects for a bright future was shown in the quarterly review released by J. L. Irwin of the Lands and Mines Department last week. It is anticipated that by the close of 1940, provided the market has been sufficiently widened, Turner Valley alone will have a daily production equal to that of Iraq.

With such a productive capacity, pipeline schemes would be economically feasible. It is maintained that new developments in prospect north of Turner Valley, at Ram Couper, River-Clearwater, Peace Couper, Stettinville, Moose Dome and the River-Clearwater. Mr. Irwin claims that average production of United States oil is only 9 barrels a day. Department of agriculture officials announced that the annual farm and home week will be held at Ohio School of Agriculture June 24 to 28. A program of field days on various topics, with lectures to augment will also include a series of demonstrations to be given by the various departments of the project is growing increasingly popular, officials state, and this year's attendance is expected to be on a par or greater than in previous years.

THE RUM ISSUE

BY FRED JONES
This Column Given to News of the Canadian Branch of the Canadian Legion

Stand To!

Since last week's issue many things have been crowded into the pages of history. Hitler again violated his pledges by invading Holland and Belgium, but the countries concerned are getting used to him so when he told Luxembourg and others a few days ago that he had no intention of crossing their frontiers they knew what to expect.

Jones Foreign Legion is going to pull out one of these days and go to the country that furnished us with a stamping ground before. France and Belgium will again be the scene of many battles and to Canada the old familiar names are coming up again in the news.

Mr. Chamberlain has given place to Winston Churchill. He made a courageous speech, and has now been included in the war cabinet. Hitler, Ribbentrop and the other high Nazis will get what comfort they can find in the fact that the men who really have their numbers are now in the drivers seat.

The Allies can now expect action as the government has been severely criticized since the war began. Such action may any day come out of its long sleep. As Paddy McCarty said the other day, "after three months of peace we have got enough men overseas to make a good crowd for a hockey game."

Kill A Horse has solved the reason for the new bonfire and the Calgary Highlanders have been issued with. He says that when a German bombing plane comes over the Highlands will stand perfectly still and looking down on these big flat bonfires the bombs will think he is just looking at a cow pasture.

Nothing will keep Matthew Murray from going with Jones Foreign Legion. He discovered a pipe to lead the boys and Saturday night a one man concert was given in front of the pub. To the stirring Scotch tunes Mr. Murray abandoned his trusty cane and danced the sword dance to the delight of his friends.

It looks as though the old battle ground in Belgium and France will again see the allies locked against the common enemy. What a thrill those who can get over again will experience after twenty-two years.

The British are rounding up a number of allies suspected of belonging to the so called fifth column. We do not wish to impose any hardship on the many loyal Germans in Canada, but there were quite a few Nazis still in large and those who desire to live at peace under our flag are in a position to bring any of the Nazi activities to the notice of the government.

Word was given out over the air Sunday of the death of Major General Matthews. At one time he was O.C. of Military District 18 and no man was held in higher esteem by both officers and men. He was in Calgary during the King's visit last summer and shook hands with many soldiers who had served under him here.

A number of Gleichen ladies attended the picture entitled 'Gulliver's Travels' last week. They told our correspondent that it was just as well to keep their husbands thinking they still believed in fairy tales.

Are we told that Gunner Wm. Oiler has been transferred from the Coast Artillery to an Anti Tank Battery at Lethbridge.

We have received word that Com. Jimmy Taylor is out of hospital but is staying in Calgary for sometime. We hope for his speedy recovery.

The Gleichen Branch held a little summer last week. For sometime and Sig Guttrich who have joined the Calgary Highlanders. Com. Bell held office of Sergeant-at-Arms in the Legion and the boys presented him with a ring bearing the Legion badge. Com. Ebbens presided at the piano and revived old songs. There was a good turnout of members and two or three of Com. Bell's intimate friends were invited.

IN THE DAYS OF MARY QUEEN OF SCOTS

When Mary, Queen of Scots, was imprisoned in Tisbury Castle, Walsingham, in 1570 she furnished proof that beer was more "to the drink of the commoner. She had her secretary quip "at what place near Tisbury beer may be provided for Her Majesty's use" to which Sir Ralph Sadler, governor of the castle, replied: "Beer may be had at Burton three miles off."

For Greater Practicability

The present day trend towards broadening the basis of the curricula for high schools and of making provision for educational and vocational guidance for the benefit of high school students and their parents in the western provinces is comparatively new, but it appears to be a move in the right direction.

As the Deputy Minister of Education for Saskatchewan recently said at a public meeting of the high school curricula at the present time is based as a preparation for entrance into university, but as he also said with truth only about ten per cent of students who take a high school course eventually reach the universities. In other words, the courses of study in the high schools are tuned to the needs of ten per cent of the students; while the other 90 per cent are largely working with little or no definite objective in view.

It does not necessarily follow, of course, that the 80 per cent who will not enter university derive no benefit from the training they receive in the secondary schools through which they pass, but it may, and often, no doubt, does mean, that the time they spend in school might be used to better advantage if the subjects made available for study are those which will be of practical value to them when they subsequently embark on the great adventure of making a livelihood for themselves.

Preparing the child for his or her entry in the commercial and industrial life of the country is not, of course, the sole objective of secondary education, but it is an important one, which must not be overlooked, if the educational system is to achieve its full mission. The other important objective of secondary education is, or should be, cultural. Equally important is it that the students acquire a high school education designed to enable him or her to secure the maximum of happiness and enjoyment in post-school life, whether it be at work or at play. In other words, preparation for leisure as well as for work should be one of the aims of secondary education.

Wider Range Needed

When, however, one considers that phase of the function of secondary education which is designed to fit the student for living in his or her chosen vocation, it is readily seen that pupils should be given a wider range of subjects from that to choose than are presently available in the average high school, insofar as facilities and finances can be made available, if students are presumed to be likely to find for themselves in the outer world after completing grade 12.

Business and commercial activities of to-day are becoming more complex and more exacting, with advanced scientific knowledge being application to industrial life and it is becoming daily more evident that if school days for 90 per cent of the students are to end when high school doors close upon them, the range of optional subjects available to them must be widened, if the objective of preparing for making a living is to be realized.

If not before then, certainly by the time the student steps into grade 12, it should be possible to determine his aptitudes and his interests, and in short, what type of work he is likely to be best fitted for after leaving school; and that usually means in what he is most interested.

That information having been docketed and analyzed it should then be a comparatively easy matter to determine along what lines the pupil's studies should be pursued to ensure maximum progress while at school and the best results later in the workaday world.

When the great variety of outlets that are offered in the industrial and commercial life of the country are considered, it can be seen that the preparatory scope of the high school must be materially broadened in the future if secondary education is to fulfill one of its major purposes in the scheme of human affairs.

The Key to Education

For some time now we have seen the shortcomings of the secondary education system and have urged changes in curricula and courses of study to bring the system more up to date and more readily to fit it to the needs and capacities, not only of the students but of society generally. Parents also are becoming aware of the necessity for greater elasticity and as this knowledge becomes more crystallized, these needed changes will be put into effect.

No matter what changes are made in the "tools" of the secondary education system, however, the fact that the curricula are not the most important thing should not be forgotten. Transcending the subjects taught and the courses of study is the teacher. It is the teacher who has character and vision and is capable of exerting the "right" influence over his charges, that students will joyfully follow the course which will be of greatest benefit not only during school days but in after life. The teacher is the key to the entire educational system. Given the right type of teacher and sufficient freedom to impress his character and influence upon the students, the latter will not likely go far astray when they face the difficulties which will face them when entering upon their vocations.

Norwegian Names

Perhaps This Will Help If You Have To Pronounce Any

In pronouncing Norwegian names a few hints may be helpful. Norwegian "y" is always "ee" and never has the sound of "z". "aa" (in Norwegian it appears as an "a" with a ring above it) has a very "aw" sound. "y" is like the French "u", spoken with lips rounded. The final "d" in "fjord" and the final "g" in the endings "berg" and "borg" are usually silent. "kj" is about halfway between "ch" and "ch"—Montreal Gazette.

Birds Not Worried

Feathered Life Not Disturbed By Bombs And Gunfire

Bird lovers, some of whom have been apprehensive that Royal Canadian Air Force bombing and gunnery ranges might disturb bird life, can forget their worries, according to the Bombing practice and air firing unit going to bother the birds at all.

In a press release the department said: "Experience in England has proved conclusively that the nature of training for air observers and air gunners under the British Commonwealth Air Training Plan causes no disturbances to such (feathered) wild life."

At a number of fact, the department added, swans in particular have been seen frequenting bombing range areas.

Trade Goes To Britain

Germany's Export Toy Industry Has Flattened Out Since War

Germany was once the world's largest manufacturer of dolls, and one of the largest of mechanical toys.

Since the war, however, the Nazi export toy industry has flattened out like a pickled balloon. British exports, on the other hand, have nearly doubled. Chief demand has been for dolls and war toys. Canada has largely increased her buying. So have South Africa, Australia and the Argentine.

War toys are most sought by countries nearest to the seat of war. And of mechanical toys of all sorts, airplanes take pride of place.

Foreign industrial workers have increased in Japan since the outbreak of the China incident.

Tea leaves are being used in making a coffee substitute in Germany.

MAKE UP WITH OGDEN'S

Ogden's Fine Cut Cigarettes are the only cigarettes cast in the production of a smooth, milder, maliceless flavor. They are the only cigarettes made up with Ogden's special "fine cut" cigarette paper. The "fine cut" is smoking enjoyment.

Plan Venturesome Trip

To Take Long Cruise In A 42-Foot Auxiliary Schooner

A North Vancouver music teacher and an Anacortes, Wash. girl who once attempted to paddle a canoe from Anacortes to Ketchikan, Alaska, are planning a cruise in a 42-foot auxiliary schooner from Louisburg, N.S. through the Panama canal to British Columbia waters.

Miss Mavis Wilcox, the music teacher, said Jack Sark, a former Yukon mining camp cook, will pilot the craft. Third member of the party will be Betty Annette Lowman of Seattle, only woman member of the Deep Sea Fishermen's Union of Seattle.

In 1937, Miss Lowman was wrecked and rescued in an attempt to paddle a canoe up the Pacific coast to Alaska.

Captain John Antle, retired Anglican clergyman of Victoria and Vancouver, is another adventurer. Seventy-three years of age, Captain Antle is now on his way to Victoria from England.

He left there in his 45-foot yacht, The Revette, crossed to Funchal, in the Madeira, where he was held up for six weeks because of the submarine menace, then made the trip across the Atlantic to St. Kitt's.

From there he went to Kingston, Jamaica, and last was reported at Cristal, the entrance to the Panama canal.

Captain Antle expected to reach Victoria about the end of May.

More Airports

No Buildings Allowed To Be Erected In Vicinity Without Permission

The Department of Transport announced that 24 airports in Canada have been designated "for direct or indirect use for military purposes" and therefore are subject to the air-pollution regulations, which forbid construction of buildings or other structures near them without permission.

At or near 10 of the airports so designated, training schools are under the British Commonwealth Air Training Scheme will be established. These are at London, Jarvis, Windsor, Kingston, Brantford and Port William in Ontario; Saskatoon, Prince Albert and Moosehide in Saskatchewan and Windsor Mills, Que.

The other airports designated are: Ontario—Hagersville, Burkh, Alliston, Welland, Ederville and Dunville; Saskatchewan—Vancouver and Oiler; Alberta—Aldridge, Crows Bar, Macleod, Gram, Peace and Pinedale.

Few Are Successful

Neither age nor experience is a specific against the itch to write popular songs, says Doran Armit, a Canadian songwriter. Over 21,000 are copyrighted yearly in the United States, most of them in manuscript, 8,000 achieve publication, and only a bare 100 emerge as hits. Of the 1,400 who write music for a living in the United States, only 130 write hits.

Japanese beetles include cultivated geranium leaves and flowers on the list, even though the plant is poison to them.

SELECTED RECIPES

INDIVIDUAL CHICKEN PIECES

1/2 small boiled oysters
1 cup cooked, diced carrots
1 1/2 cups cooked peas
1 cup cooked, diced potatoes
1/2 cup diced, cooked chicken
2 cups well-seasoned chicken gravy or white sauce, salt
20 Cokes milk lunch biscuits
1/2 cup butter

1/2 small individual baked dishes put a portion each of the vegetables, carrots, peas and potatoes, the chicken, butter and sauce. Spread a portion on top of each dish. Bake in a 350 oven (450 deg. F.) until top is lightly browned. Six pies.

RANGER COOKIES

1/2 cup shortening
1/2 cup granulated sugar
1/2 cup brown sugar
1 egg
1 teaspoon vanilla extract
1 cup flour
1/2 teaspoon soda
1/2 teaspoon baking powder
1/2 teaspoon salt
1 cup quick cooking oatmeal
1 cup Kellogg's Rice Krispies
1/2 cup coconut

Blend shortening and sugars thoroughly, add egg and baking; beat well. Sift flour, soda, baking powder and salt together; mix with oatmeal, Rice Krispies and coconut; add to creamed mixture and stir until well mixed. Drop by spoonfuls onto well-greased baking sheet, and bake in moderate oven (350 degrees F.) about 15 minutes or until brown. Yield: Four dozen cookies (two inches in diameter).

Would Require Plenty

The Brookville Record and Times says how much freight the railways of Canada are capable of moving is shown in the Bureau of Statistics report that during January revenue freight loaded at Canadian stations or received from foreign connections totalled 7,156,622 tons, the highest for that month in any year since 1920. A mathematician may figure how many motor trucks would be required to carry such a volume of traffic.

Artificially flattening the head is an old custom found by anthropologists in every continent of the world, except Australia.

Looking For Proof

Veteran Seeks Comrades Who Know Where He Lost His Tooth

A set of false teeth has started a Canada-wide search for ex-members of the 124th Battalion, transport section, who were at Goldfish chateau, railroad, near Ypres, in October, 1917.

High Thornley, Great War veteran, a patient in Shaughnessy military hospital, Vancouver, is the man who needs the "lost teeth". He is trying to get them through the veteran's pension board, but there is no proof he lost his teeth under fire at Chateau Goldfish. He must obtain the testimony of men who were there with him the night it happened.

So Thornley placed a classified advertisement in a newspaper. He requested information regarding the whereabouts of George Almond, Bobby Gibbs, "Irish" Jones, or any other member of the 124th Battalion.

Almond, Thornley's sergeant, was in a hut when High Thornley staggered in with a bloody head and almost toothless mouth. He and Bobby Gibbs would remember that on the night of Oct. 17, 1917, they volunteered to dash across a 200-yard no-man's land, under heavy fire, to bring back a sack of coal. His was the railroad yard.

From there he went to Kingston, Jamaica, and last was reported at Cristal, the entrance to the Panama canal.

Captain Antle expected to reach Victoria about the end of May.

No Buildings Allowed To Be Erected In Vicinity Without Permission

The Department of Transport announced that 24 airports in Canada have been designated "for direct or indirect use for military purposes" and therefore are subject to the air-pollution regulations, which forbid construction of buildings or other structures near them without permission.

At or near 10 of the airports so designated, training schools are under the British Commonwealth Air Training Scheme will be established. These are at London, Jarvis, Windsor, Kingston, Brantford and Port William in Ontario; Saskatoon, Prince Albert and Moosehide in Saskatchewan and Windsor Mills, Que.

The other airports designated are: Ontario—Hagersville, Burkh, Alliston, Welland, Ederville and Dunville; Saskatchewan—Vancouver and Oiler; Alberta—Aldridge, Crows Bar, Macleod, Gram, Peace and Pinedale.

Light enough to be easily handled—sturdy and tough to provide a permanent job—Gyproc is the ideal material for walls and ceilings. The large sheets of pre-cast fireproof gypsum reach from floor to ceiling. Just a few sheets nailed in place and the job is done.

And Gyproc gives you all these advantages:

- FIREPROOF—therefore safe
- PERMANENT AND DURABLE—therefore economical
- WILL NOT CRACK, WARP, SHRINK OR SWELL
- INVISIBLE JOINTS—panel strips are unnecessary
- SMOOTH, DUST-FREE SURFACES—easy to keep clean
- TAKES ANY TYPE OF DECORATION—no monkey
- THE LIGHTEST WEIGHT gypsum wallboard made in Canada.

GET GENUINE GYPROC—identify it these two ways!

1. Look for the name GYPROC on the back of every sheet.
2. Look for the Green Strips on the edges.

Accept no substitutes.

Gyproc is sold everywhere in Canada. See your local dealer in Lumber and Builders' Supplies.

Write to our nearest branch for free Gyproc booklet.

The Park Lane Mystery

By Edgar Wallace

Copyright, by Edgar Wallace, Serialized by Ledger Syndicate.

CHAPTER III.—Continued

"Mine is rather a delicate errand, but it struck me—I have found myself thinking about you many times since we met—that possibly you might be able to find a good post for your situation. If you will forgive my saying as much, it is a little tragic. Association with—criminals or people with criminal records has a dragging effect even upon the finest nature."

"In other words, Mr. Harlow," she said quietly, "you're under the impression I'm rather badly off, and"

"They've dashed his forehead daintily with a stilet handkerchief and rose steadily to his feet."

"You'd better let me take you home, Mr. Harlow," he said.

"That is quite unnecessary—quite," he said. "I have my car at the door, and a remedy for all such mental disturbances as these. And it is not a drug," he smiled.

Nevertheless, Erik went down with him to the car.

"Will you tell my chauffeur to drive to the Charing Cross power station?" was the surprising request, and long after the car had moved off in the fog Erik stood on the sidewalk, wondering what business or pleasure this multimillionaire to such a venue.

They evidently knew Mr. Harlow at the power station, and at any rate saw nothing remarkable in his visit. The engineer, who was smoking at the door, stood back to let him walk into the great main machinery hall, and placed a stool for him. And there, for half an hour, he sat, and the drawing of the dynamo and the whirr and thud of the great engines were sedatives and anodynes to his troubled mind.

Here he had come before to think out great schemes, which developed best in this atmosphere. The power and majesty of big wheels, the rhythm of the driving belts as they sagged and rose, the shaded lights above the marble stairways, the quiet of it all stimulated him as nothing else could. Here he found the illusion of irreversibility that attained so perfectly to his own mood; the inevitable effects of the inevitable causes. The sense that he was standing near the very heart of power was an inspiration. This lofty

you see him. I understood you were working in the office of the New Library Syndicate?" She smiled at this.

"It's curious you should say that: their office is in Lincoln's Inn Fields, but next door."

"Ah!" he said. "I see how the mistake arose," and added quickly: "A friend of mine who knows you saw you going into—an office, and obviously made a mistake."

He did not tell her who was their mutual friend, and she was not sufficiently interested to inquire.

"This time the knock at the door was more pronounced."

"Will you excuse me?" she said. "Those are my cleaners, and one of them is rather inclined to tell me their business, and I may keep you waiting a little while."

She hurried out of the room, and he heard the sound of a door opening, as Jim Carlton and Erik came back into the dining room.

"A very charming young lady that," said Jim Harlow.

"Very," said Jim shortly.

"Women do not interest me greatly," the Squire Harlow picked a dry thread of cotton from his immaculate case and dropped it on the floor. "They think I'm difficult to follow. They find it difficult to follow. They are emotional, too—swayed by monetary fears and scruples."

The sound of voices in the passage, one high-pitched and complaining:

"... what with the fog and everything, miss, it's lucky we're here at all. ..."

"Two shabby figures passed the open door, followed by Alice."

"I suppose you don't know Ingle Mr. Harlow?" Jim was examining the photograph on the mantelpiece.

"A long-drawn, slender, clever, but with a kink even in his knickerbockers. Believes in revolution and all that sort of thing. ... blood and guano and tumblers; the whole box of tricks."

Something made him look round. Mr. Stratford Harlow was standing in the centre of the room, gripping the edge of a small table that he had brought in.

"It is very kind of you—most kind," she said, and meant it. "But I have a very good post in a lawyer's office."

He inclined his head graciously.

"Good People"

"Mr. Stebbings has been very good to me."

"Mr. ...?" His head jerked on one side. "Stebbing's—of Stebbings, Field & Marrow—surely not? They were my lawyers until a few years ago."

She knew this also.

"Quite good people, though a little old-fashioned," he said. "Then of course you have heard Mr. Stebbings speak of me?"

"Only once," she confessed. "It was a very recent man and never talks about his clients."

Harlow bit his lip in thought.

"An excellent fellow! I have often wondered whether he was taking my affairs from me. I wish you would mention that to him when you see him."

"They've dashed his forehead daintily with a stilet handkerchief and rose steadily to his feet."

"You'd better let me take you home, Mr. Harlow," he said.

"That is quite unnecessary—quite," he said. "I have my car at the door, and a remedy for all such mental disturbances as these. And it is not a drug," he smiled.

Nevertheless, Erik went down with him to the car.

"Will you tell my chauffeur to drive to the Charing Cross power station?" was the surprising request, and long after the car had moved off in the fog Erik stood on the sidewalk, wondering what business or pleasure this multimillionaire to such a venue.

The bearded tutor had left (Mrs. Edwin, the maid, tearfully explaining a fortnight before the passing of Miss Mercy.

"And if he hadn't gone," said Miss Alice with light lips. "I should have more about the work of him. Such has been suppressed; He hasn't a word to say for himself."

The council, including the family lawyer, who was making his first acquaintance with Stratford, was held. It was agreed that The Boy should have a flat in Park lane and the companionship of an older man who combined knowledge of the world with a leaning toward piety. Such was found in the Rev. John Bartholomew, an ex-naval chaplain. Mrs. Edwin was persuaded of the beginning of Stratford's independent life being celebrated with a dinner and a visit to "Charley's Aunt," through which roving fare he could with a story face.

(To Be Continued)

Danes Are Broken-Hearted

Know Their Country Taken By Treachery Is Facing Ruin

The day before the Nazis invaded Denmark, the Danish king and queen personally by Germany that Hitler had no intention of sending his forces into that country.

C. Harsch, correspondent of the Christian Science Monitor, called his king was being assured. Yet, when the king was being assured, there were four German consuls at anchor in Copenhagen harbor with soldiers under their hatches. They stayed there in the darkness all that Monday and all that night. At 5 a.m. they came out to take the capital in the morning mist.

"Denmark is broken-hearted," Harsch writes. "I never dreamed that Denmark would be so heartache in a people."

"Physically they are so, far, not really treated. The force of occupation is trying to be inconspicuous. Outwardly, one sees only the sentries with fixed bayonets in front of the houses taken for headquarters. The grim efficient columns of war which move through the streets, the few soldiers duty paying at windows with full of butter and chocolate and cheese."

German authorities act through the Danish government. The Danish flag flies everywhere. Germans are trying to prove to the outside world that they can occupy.

But these are not the thoughts that count in the hearts of the people.

"German authorities talk new trade opportunities with Germany. A staff of trade negotiators is already working on arrangements which will integrate Denmark in the German economy. They have scheduled work which will keep Denmark busy. Germany can provide coal, but not the high quality needed in most of the factories. They will have to be re-equipped in many respects."

"Perhaps some German steel will be taken to Denmark, but the Germans spare any even if it can continue to get Swedish ore via the Baltic."

"And where will oil and gasoline come from? These are Denmark's major industrial

YOU JUST CAN'T EQUAL the way it drives and rides!

Illustrated—Chevrolet Special De Luxe Sport Sedan.

You know!... Tests are better than talk, and riding beats reading!... That's why we invite you to take a thorough-going demonstration ride in Chevrolet for '40. You'll find you can't equal Chevrolet driving ease—

Because Chevrolet has the Improved Vacuum Power Shift, which supplies 80% of the gearshift effort automatically, instead of making you tug and pull and do all the work yourself!

And you can't equal Chevrolet riding ease, either—Because only Chevrolet has "The Ride Royal", which combines Perfected Knee-Action, Scientifically Balanced Springs and Automatic Ride Stabilizer to produce the smoothest, safest ride known!

Will you make the test—today? There's a car waiting for you at our showrooms right now!

CHEVROLET HAS MORE THAN 175 IMPORTANT MODERN FEATURES, INCLUDING: NEW "ROTOR CLIPPER" TYING • BODGE INSIDE AND OUTSIDE • NEW SEALS • BEAM HEADLIGHTS WITH SEPARATE PARKING LIGHTS • NEW FULL-VISION BODIES BY FISHER • SUPER-QUIET VALVE-IN-HEAD ENGINE • PERFECTED HYDRAULIC BRAKES • LARGE TYPEDOMATIC CLUTCH.

*On Special De Luxe Models.

Chevrolet's Amazing VACUUM POWER GEARSHIFT

The improved steering column gearshift that does 80% of the work for you and requires only 20% driver effort!

Chevrolet's Famous "RIDE ROYAL"

Chevrolet's Perfected Knee-Action Riding System—plus many other advanced features—brings you ride results never before known.

Printed Stationery

The printed way! Neatly printed stationery—bill-headers, statements, invoices, shipping tags, time-sheets, envelopes, letterheads, memorandum sheets, etc., etc. All of these and many other ideas can be used to advantage in most business, probably in yours!

Think it over!

Come in and see our samples, ask us about it! We are at your service.

The cost is small compared to the returns direct and indirect. Delay no longer.

THE CALL JOB DEPT.

Town & District

Mrs. McConnell and her daughter, Jean, have returned to town from Calgary where they spent the winter.

Wonder why Jones' Foreign Legion does not parade? We would like to see the Legion members doing their stuff on the parade ground.

Beg-pipes and the Scottish also played were quite an attraction on the street Saturday evening. Quite a crowd surrounded the piper and encouraged him on.

Max Yates received word Monday that he has passed all his recent examinations at the university. The Call congratulates Max on his success. He still has two more years of study ahead of him before he is through.

The Alberta Safety League issues the following warning against carbon monoxide—a deadly odorless gas that is given off by automobile exhausts. This deadly gas can and does seep in the passenger compartment of moving vehicles in sufficient quantities to be harmful to the driver and any others he may have in his car. To prevent being overcome by this gas, always open the garage door before starting your motor, and keep at least one window open while you are driving. It is advisable to have the exhaust system of your car checked periodically to make sure that there are no leaks.

Bury at Alberta Red Cross workers, are providing comforts and surgical supplies for Canada's troops in the war, they have their thought for the civilian victims of Hitlerism in European countries overrun by German hordes. These include Polish, Finnish and other European refugees located in various countries. According to divisional records to date, they have been shipped from Alberta approximately 3,000 articles of miscellaneous clothing for distribution among refugees. Branches participating in this endeavor are: Edmonton, Calgary, Medicine Hat, Lethbridge, Wetaskin, Standard, Bassano, Rockyford, Blairmore, Big Valley, Lacombe, Waterton Park, Fenn, Lundbreck, Coronation, Warner, Crossfield.

ST. ANDREW'S CHURCH

Service Sunday, May 19th.
Morning service at 11 a.m.
Rev. L. H. Pearson, Incumbent.

THE WORLD OF WHEAT

This war is likely to be extremely bitter, cruel and long. We are fighting against a courageous, efficient, well-prepared and unscrupulous enemy. To win the final victory every citizen of Canada and of the other Allied countries will be called upon to make both contributions and sacrifices. Contributions in the way of producing as much as possible of foodstuffs, munitions, supplies and equipment, and all for moderate rewards in the way of wages, incomes and profits and sacrifices in the way of giving up something valuable at no personal reward or return at all. These sacrifices will be, mainly, money contributions in the form of taxes and loans at low interest.

Our western farmers already have made good contributions and considerable sacrifices. Contributions in the large quantity of wheat which they have made available, and which now free the Allied governments from any fear of a food shortage, and money sacrifices, too, because our farmers have made this wheat available to the Allies at a price that is most definitely less than its cost of production.

Our farmers, therefore, can be extremely proud of the efforts they already have made towards the winning of an Allied victory.

Venezuela is a country which depends for its state revenue upon high tariffs against imports. The prices, therefore, of things to be purchased in Venezuela are very high, and the standard of living of the people is low.

In Curacao, however, which is a Dutch island some 80 miles away from Venezuela, tariffs are either non-existent or very low. In consequence imported goods and products from all over the world are abundant, prices cheap (considerably cheaper than in Canada), so the standard of living of the people is high.

In Venezuela, a very ordinary luncheon costs \$2.50 (American money). The same luncheon in Curacao can be had for 35 cents. American cigarettes are 50 cents a package in Venezuela and in Curacao 10 cents—the same brand in Canada costs 25 cents. White cotton shirts, of a standard brand, made in the United States, are considerably cheaper in Curacao than they are in Canada. In Venezuela the people are

IF INTERESTED... in the broader aspect of current grain problems, secure a copy of our Weekly Letter from our Agent.

We are members of the Alberta Crop Improvement Association and are prepared to make better seed available to farmers at actual cost.

absolutely underfunded and discontented, whereas in Curacao they are well-fed, smiling, happy and contented.

The thought occurred to me how much better off our western farmers would be if they too, like the Curacao people, could buy what they need on world's markets, where they sell their wheat, without having to pay heavy tariff and import duties.

Highway repair projects are being rushed to completion, it has been announced by the public works department. Damaged over a wide area by abnormal spring weather conditions, the roads will be in shape for the coming of the tourists, it is said. Tenders have been called in connection with gravelling work over 26 miles of the Evergreen Highway to Jasper. All bays have been filled.

There is no plan under consideration to alter the federal crop bonus scheme, Hon. J. G. Gardiner announced.

ed. As it is now administered, the return of a farm gets the bonus and not the owner. Or if the land is operated by a hired man while the owner is resident elsewhere, the bonus is not paid at all.

There is no closed season on the suckers who expect to get something for nothing. Putting on style and putting creditors usually go hand in hand.
